THE TECH

VOL. XXVI. No. 45 BOSTON, MASS., WEDNESDAY, FEBRUARY 6, 1907 PRICE THREE CENTS

HAS SUCCESSFUL TRIP.

Basketball Team Plays West Point, C. C. N. Y., and Brooklyn Polytechnic.

With a record of two close games with West Point and the College of the City of New York, and a victory over the crack Brooklyn Polytechnic five, the basket ball team retnrned Monday from its very successful trip to New York. As this was the first extended trip of the kind which a Technology team has made, its result is regarded as most satisfactory and worthy of repetition.

The team left Boston Tuesday, the following men being sent: Manager Whitmore, Capt. Kinnear, Nichols, '09, Bitler, '08, Pierce, '08, and Campbell, '06. Coach Schonthal accompanied the team. On Wednesday evening the team met the College of the City of New York in New York and after a close game was defeated by the score of 20 to 14. The following evening Tech defeated the star Brooklyn Polytechnic Institute team in a rough game. Kinnear was knocked unconscious during the struggle but pluckily returned to the game and, by brilliant playing in the second half, helped to clinch the game for Tech.

On Friday evening a game was to have been played with the New York University Law School, but unfortunately turned out to be rather a fluke. After a disappointing contest the Institute five was badly defeated by a semi-professional team, (only two members of which were Law School men) on a floor totally unsuited for basket ball.

On Saturday they journeyed up the Hudson to West Point and in the afternoon played the cadets. The Tech five played a good game, and by consistent covering were able to hold the West Pointers down to a score of 19 to 13.

That the Institute men played excellent ball throughout the trip is evidenced by the fact that their strong opponents defeated them by but small leads. Captain Kinnear's work was especially noteworthy, and the press reports of the games speak most highly of his playing.

The lineups:

C. C. N. Y.	M. I. T.
Barbanell (Capt.), r.f.	l.g., Campbell
McCreedy, l.f.	r.g., Nichols
Goldman, c.	c., Pierce (Whitmore)
Brenner, r.g.	l.f., Bitler
Periman, l.g,	r.f., Kinnear (Capt.

Score — C. C. N. Y., 20; M. I. T., 14. Field Goals — Goldman 5, Brenner 3, Kinnear 3, McCreedy, Barbanell, Bitler and Pierce. Goals from Fouls — Kinnear 4.

M. I. T.	POLYTECH.
Kinnear (Capt.), r.f.	l.g., Frazer
Whitmore, l.f.	r.g., Russel
Pierce, c.	c., Lathrop (Capt.)
N chols, r.g.	l.f., Gionella
Campbell, l.g.	r.f., King

Score — M. I. T., 17; Brooklyn Polytech., 14. Field Goals — Kinnear 3, Whitmore 2, Pierce 2, King 2, Gionella, Lathrop, Russel. Goals from Fouls — Lathrop 4, Kinnear 3.

ARMY.	M. I. T.
Newman, r.f.	l.g., Campbell
Rockwell, l.f.	r.g., Nichols
Highley, c.	c., Pierce
Beardslee, r.g.	l.f., Whitmore
Johnson, l.g.	r.f., Kinnear

Score—Army, 19; M. I. T., 13. Field Goals—Kinnear 2, Pierce 2, Campbell, Nichols. Goals from Fouls — Kinnear, Beardslee.

NEW HEAD OF COURSE.

Prof. Jackson Assumes Duties of Head of Electrical Engineering Department.

Professor Dugald C. Jackson, who was last fall appointed to the place of Professor of Electrical Engineering and head of the Electrical Engineering Department at the Institute, took up his duties with the opening of this school term. Prof. Jackson comes to the Institute as successor to Dr. Louis Duncan, who resigned about a year and a half ago.

Professor Jackson comes to the Institute with a very creditable career behind him. Born of Quaker stock at Kennet Square, Chester County, Pennsylvania, Feb. 13, 1865, he was fitted at the Hill School, Pottstown, Pa, for the Pennsylvania State College, from which he was graduated in the civil engineering course in 1885. He was a fellow and instructor at Cornell University for two years, and joined the University of Wisconsin faculty in the autumn of 1891, upon the establishment of the department of electrical engineering, as professor of electrical engineeering and head of the department. He organized the course in electrical engineering and taught various branches pertaining thereto but has made a specialty for several years of alternating currents and alternating machinery, and of central station practice. Under his administration there has grown up at the University of Wisconsin one of the strongest schools of electrical engineering in the country, the greatest in the West.

PROFESSOR DUGALD C. JACKSON.

Professor Jackson has combined in a very admirable way practice of his profession with the work of the teacher, having served as consulting engineer and expert in many large pieces of important engineering work. As President Pritchett speaks of him, "He is a man who has combined in a successful way the practice of the engineering profession with the vocation of the teacher, a combination more and more called for in our schools of technology." He was connected with the Edison Electric Lighting Co. and Sprague Electric Railway interests before going to the University of Wisconsin, both as an expert and actively as superintendent and general manager. He has since been the technical

(Continued on Page 3.)

IS OF PECULIAR INTEREST.

Prexy's Annual Report Deals With Future Problems of the Institute.

President Pritchett's report, issued during the vacation, is of peculiar interest, because his resignation as President twelve months before it was written purges it of all personal predictions. He remarks in the first paragraph, "Whatever is said in this report is said in the capacity of one who lays down the work rather than the one who expects to carry it on."

The relation of the Corporation to the government of the Institute is the first interesting topic with which he deals. Originally the Corporation dealt with the administrative work of the school but because of its large membership this method proved unsatisfactory and the executive committee was created to take care of the details. But, as President Pritchett says, "The creation of this body has had a tendency to carry the administration to the other extreme and to intrust to the executive committee almost the entire direction of the Institute." He then recommends that some system be adopted by which every member of the Corporation may be kept interested in the problems of the school.

Dr. Pritchett lays out three fundamental questions for the future policy of the school. The first is the development of the intellectual work of the school. During the last twenty years there has been a continual tendency to differentiate technical education to meet the demands of the subdivisions of engineering. This tendency has probably gone too far, and it is necessary to return to greater simplicity and to the teaching of the fundamental sciences.

The second problem which should be settled at the earliest practicable moment is that of the location of the Institute during the next 15 or 20 years. Having settled these fundamental questions, the Corporation next needs to consider the means of providing money for endowment and for buildings, so as to make the selected site the seat of an effective and well-equipped group of engineering buildings.

Dr. Pritchett then points out that this is a transition period for the college of technology. There is a continual tendency for young men who can afford the time and money to go first to the academic institution and then to the technical school. The number of these students is growing. Under this tendency there will be differentiated two classes of technological institutions, one, the undergraduate, the other, the graduate. The tendency stands directly across the path of the Institute. President Pritchett says that the Institute will probably remain for many years to come essentially an undergraduate college. However, to keep the Institute at the forefront as it has been in the past, the graduate and research work must be developed.

The President also touches on the attitude of the technical school toward manufactures. The Insti-

CALENDAR.

WEDNESDAY, FEBRUARY 6.

4.15 P.M. Glee Club Rehearsal at the Y. M. C. A.

THURSDAY, FEBRUARY 7.

4.00 P.M. Banjo Club Rehearsal in 33 Rogers.

4.00 P.M. Glee Club Rehearsal at the Y. M. C. A.

7.30 P.M. Weekly Y. M. C. A Meeting in Parish Hall.

FRIDAY, FEBRUARY 8.

4.00 P.M. Mandolin Club Rehearsal in 31 Rogers.

4.15 P.M. Glee Club Trials at the Y. M. C. A.

8.00 P.M. Architectural Society Smoker at the Union.

FACULTY NOTICES.

Military Science.—The first drill exercise will take place today according to Tabular View.

Telephony. — Exercise will begin on Thursday Feb. 7, at 10 o'clock, the appointed hour on Tabular View.

Course V. — The first exercise in Gas Analysis will be held in 24 Walker, Monday at 9 A.M.

Bring note-books.

Third Year. — Attention is called to the change of hours in Organization of Industry as noted on the General Bulletin.

Organ. of Industry. — The class in Organization of Industry will meet Wednesdays at 10 and Saturdays at 12 in 42 Rogers.

Europe. — Students planning a trip to Europe for study or recreation may receive suggestions and advice on language study and Pensions in the continental countries from Prof. Vogel, 33 or 24 Lowell, or by appointment at any time.

Gym. Work. — Regular Gymnasium work will begin today at 4.15 P.M. A class in heavy gymnastics consisting of all kinds of apparatus work will be held on Mondays, Wednesdays, and Fridays at 5.05 P.M. All students interested are requested to attend.

Requests for Books. — A Request Book has been placed in the General Library in Rogers Building in which students are invited to write the name of any book which they wish purchased for the Library. The book will be bought if the funds allow and it seems suited to the general needs of the Library.

HELP WANTED.

An important plant test lasting seventy-two hours will be run at the Haverhill Electric Light Co. during the week of Feb. 11. The work is in charge of five Seniors in Course VI and they are desirous of securing the services of competent third year men in Courses II, VI, X, and XIII. Each man will be asked to work eight hours, but anyone can work on two or more shifts if he wishes. Men wishing to go on this test will leave their names with Mr. C. H. Porter of the Electrical Department, or with Dean, Pease, Keeling, Whitney, or Frank, Course VI, 1907.

THE TECH

Published every Monday, Wednesday, and Friday during the college year (from September to June), by students of the Massachusetts Institute of Technology.

Entered as second-class matter October 6, 1904, at the post office at Boston, Mass., under the Act. of Congress of March 3, 1879.

Wednesday, February 6, 1907.

THE TECH regrets to announce the resignation of Messrs. Erle F. Whitney, 1907, and John M. Frank, 1907, from the Board of Editors. Mr. Maurice E. Denny, 1908, has been elected Editor-in-Chief and Mr. W. F. Dolke, Jr., 1908, Managing Editor, to fill the vacancies created. Mr. G. S. Witmer, 1908, has been granted a leave of absence from the board.

Welcome home to the Bursar! He's come back from Florida to tell us he picked ripe oranges "from trees."

Technology won a banner from Harvard in the cross-country race last fall, and the members of the Institute team who secured places in the race also won trophies. Neither the banner nor the trophies have been forthcoming as yet. THE TECH does not understand whether a Tech man is to blame because Harvard has not presented these fruits of the victory, or whether the cause of the delay lies with the Cambridge men. THE TECH also notices that the 1906 Field Day banner has not yet been hung up in the Union. There are probably many weighty reasons for the delay, but it is to be hoped that when the banner is hung up the class of 1909 will have no cause to feel that disgrace and shame which the class of 1908 has suffered because of the "second-hand" banner which represents its victory in the 1905 Field Day. Will the persons who have these two matters in charge kindly see that the cross country trophies are not forgotten, and also that 1909 is given a banner that is equal in value and appearance to the banners of the 1903 and 1904 Field Days?

Athletic Trophies.

With the opening of the second term the winter athletic season begins in earnest. The Track Team has the best schedule in years, the Fencing Team has made extensive plans, and the Basketball Team has the majority of its home games to play this month. Captains, managers, and coaches of all teams have been working hard and faithfully. Perhaps it would be pertinent at this time to suggest that some of the other fellows turn out and do some work. Every team needs you, either as a candidate or as a rooter.

It is somewhat of a novelty for Tech's athletes to make a journey around the collegiate circuit, and I daresay the hard-worked young men of science on the basket ball team are enjoying the experience mightily. Mid-years, and all that they mean to Tech students, are doubtless completely forgotten. Yale, Harvard, and other collegians can scarcely understand the tremendous lark of a holiday jaunt in the career of Institute workers. One can easily feel a sympathy for youth which is deprived of athletics so greatly as these future exemplars of applied science.

"OLD GRAD." — *Boston Herald.*

"Think of every unanswerable and unearthly question anyone ever heard of, also a few that no one ever heard of, and answer them with great care, stating how you drew your conclusions." This, the Sophomores say, is a condensation of the recent mid-year exam in Physics.

WANTED

Investment involving half ownership or more, and any official position, in old established iron works in important New York city, is offered satisfactory young gentleman with $50,000 to $100,000; same required for working capital and improvements. Principal specialty absolutely staple. General engineering opportunities many. Particulars only upon suitable introduction, financial and general. Positively no brokers.

Address "Iron Works," care THE TECH.

IS OF PECULIAR INTEREST.

(Continued from Page 1.)

tute should be in closer touch with the manufacturers and commercial interests so that the leaders in the latter class of industry will better appreciate what technical education is doing for them. He also points out the good effect a close relation between the theoretical and practical sides of engineering would have on professors, who too often lose the point of their practitioner in their teaching of the applied sciences. Moreover, the average business man will cease to look upon the college as a persistent beggar, and colleges will assume the position of co-laborers in America's industrial problems.

The reports of the Departmants show throughout a pressing need of more money and more room. Larger and better-equipped laboratories, better and more apparatus, and larger recitation rooms are called for everywhere. In the civil engineering course, Professor Swain suggests that a summer term be installed for field-work to do away with such work during the regular school term.

The Mechanical Engineering and the Chemical Departments need more room and apparatus, and Professor Talbot points out that the chemical laboratories are spread through the various buildings. Professor Peabody presents a very excellent report on the courses in naval architecture in Europe, saying that the course at the Institute compares favorably with those abroad.

"JANITORS' UNION" MEETS.

The Technology Employees' Mutual Benefit Association held a smoker at the Union last Thursday evening, with forty-two present. Prof. Wendell, Mr. Blachstein, and Mr. Rand were the guests. A quintet from the Banjo Club, composed of Gerrish, '08, Sharman, '08, McGinniss, '08 and Sharp, '09, gave a musical program. The officers of the association are E. Edwards, president; F. W. Perkins, vice-president; F. G. Hartwell, secretary; and W. F. Wilton, treasurer.

NEW HEAD OF COURSE.

(Continued from Page 1.)

adviser of various manufacturing and other corporations.

Professor Jackson's coming to the Institute will strengthen the corps of instructors by the addition of a man of large practical experience, of high academic aims, and of vigorous and progressive ideas in education. It is believed also that he will be able to strengthen the connection between the teaching and practice of the electrical engineering profession.

HOCKEY TEAM BEATS WILLIAMS.

During the vacation the Hockey Team has been busy at home, playing, beside minor games, two important intercollegiate games with Massachusetts teams. On Wednesday the team went out to Williamstown and defeated Williams College, 2 to 1, in a fast match. Williams was outplayed in every department of the game. The passing and team work of Tech, together with the fine goal work of Billings, were the features.

On Thursday the team played Springfield Training School at Springfield and were unable to score against the Training School seven. Tech put up a lively game, but her forwards could not keep the puck long in Springfield territory. The score was 5 to 0.

KEITH'S THEATRE.

Next week will be a notable one at Keith's Theatre, for Houdini will return for a special engagement of twelve performances, at each one of which he will accept a challenge. Edwin Stevens is to show his versatility as a character actor in a new sketch, and the Colonial Septette have the prettiest musical act ever produced in vaudeville. Wilfred Clarke will star in "What Will Happen Next?" written by himself. The other entertainers for the week are George H. Wood, Holcombe, Curtis and Co., the Outlaw Trio, the Frazer Trio, Herbert, the Frogman, the Sawadas, Japanese Acrobats, Conlon and Hastings, Tyson and Brown, and the Kinetograph.

NOTICES.

Portfolio.— All Seniors' Portfolio pictures must be taken by Feb. 16.

Architects. — The Architectural Society will hold a smoker at the Union Friday evening.

Glee Club. — Rehearsals will be held at the Y.M.C.A. Wednesday and Thursday at 4 P.M. Trials will beheld at the Y.M.C.A. Friday at 4.15 P.M.

Mandolin Club.—The first rehearsal will be held in 31 Rogers, Friday at 4 P.M. Every member must be on hand as the first concert comes on February 15. New music will be given out Friday.

Y. M. C. A. — The Rev. Mr. John Hopkins Denison of the Central Congregational Church will give a series of lectures before the Technology Christian Association beginning Feb. 7. Dr. Denison is a man of broad culture and experience, as is suggested by the following topics upon which he is to speak: Feb. 7, 7.30 P.M. "A month among the Cannibals of German New Guinea." This lecture will be illustrated with lantern slides made from snapshots taken by himself. Feb. 14, 1.30 P.M. "Social and Moral Conditions on the East Side of New York City." Feb. 21, 1.30 P.M. "The Influence of Christ Today." Particular attention is called to the change in time of meeting on Feb. 7 to 7.30 in the evening. All meetings will be held in the Parish Hall of Trinity Church.

TREMONT THEATRE.

This week will be the last of Henrietta Crossman at the Tremont Theatre in the delightful comedy "All-of-a-Sudden Peggy," by all odds one of the best things Boston has had for a long time, and one of the cleverest character portrayals in which this gifted actress has ever been seen. No one should miss this treat. This assertion is made on the strength of the enjoyment that is offered by Miss Crossman and her company in this merry play.

'08 EDITOR RESIGNS.

George S. Witmer has resigned from his position of Grind Editor of *Technique '08*. At a meeting of the Board of Editors held Monday, Jan. 7, Channing Turner was elected to the position.

We wish to call the attention of students who have any baggage work to do to Phillips' Express. Mr. Phillips, the proprietor, is well known to many of the Tech men and has always been ready to assist any of the publications which have been undertaken by the students, and we can recommend him to any one as being very reliable. His advertisement will be found in another column.
